Dear Hiring Manager,

I am writing to express my interest in a remote or hybrid role within the fields of AI operations, prompt engineering, automation support, or AI-assisted development. I have developed a unique combination of technical, creative, and leadership skills that allow me to solve problems, build tools, and guide others using AI systems.

Although my professional background includes CDL driving, equipment operation, logistics, and supervisory roles, I have transformed my career through self-taught AI development. I now use AI every day to build applications, design workflows, create digital products, and mentor others. My ability to break down complex tasks, create structured prompts, and use AI to build real tools has become one of my strongest assets.

I recently created "AI for Everyone — Learn, Build, Grow," a complete seven-module course designed to teach beginners how to understand and use AI. I also developed SpiritFeed, an Android app built through AI-assisted development, featuring multiple investigative tools and real-time systems. These projects demonstrate my ability to think creatively, structure technical information, and execute full solutions using AI from concept to completion.

In addition to my technical growth, my years in operations and leadership roles have strengthened my communication, organization, decision-making, and problem-solving abilities. I bring a strong work ethic, high adaptability, and the ability to stay focused and productive under pressure.

I am confident that my unique combination of hands-on experience, creativity, and AI-driven problem-solving will allow me to make a meaningful contribution to your team. I am eager to bring my skills into a role where they can be used to support innovation, streamline workflows, build digital solutions, and help elevate your company's technology capabilities.

Thank you for taking the time to review my application. I would welcome the opportunity to discuss how my background and AI experience can be a strong fit for your needs. I am available at your convenience and would be excited to speak with you.

Sincerely,

Chad Groover
